EDUCATION LEVEL

STI College – Baliuag, Bulacan

July 2019 – July 2023

Bachelor's degree in Information Technology

SKILLS

PROGRAMMING

Languages	Frameworks	Skill Level	Experience	Pro-Experience
Java	-	Advanced	4 years	
C#	.Net , ASP.Net Core	Advanced	3 years	1 year
JavaScript	NodeJS, ReactJS	Advanced	3 years	4 years

WEB DEVELOPMENT

HTML5, CSS	-	Advanced	6 years	4 years
------------	---	----------	---------	---------

DBMS

MS SQL	-	Advanced	5 years	2 years
MySQL	-	Advanced	7 years	4 years
MongoDB	-	Intermediate	-	-

ERP

SAP Business One	-	Intermediate	2 years	-
------------------	---	--------------	---------	---

VERSION CONTROL

Git	--	Advanced	4 year	4 years
-----	----	----------	--------	---------

SOFT SKILLS

Problem-solver	Critical Thinker	Time-management	Multi-tasker
Leadership	Openness to criticism	Teamwork	Willingness to Learn

EXPERIENCES

Freelance Web Developer (Work From Home)

July 2022 – January 2023

- Worked as a web developer using Javascript
- Designed and implemented inventory management systems to track stock levels, optimize reorder points, and reduce waste.
- Designed and implemented inventory management systems using HTML and CSS for the front-end interface, ensuring a user-friendly experience.
- Integrated real-time inventory updates across sales and supply modules, improving accuracy and data synchronization.
- Developed custom inventory reports to support data-driven decisions for purchasing and demand

forecasting.

- Automated stock audits, reducing the need for manual checks and increasing operational efficiency. Developed a solid understanding of software development principles, including version control (e.g., Git), code documentation, and collaboration tools (e.g., GitHub).
- Employed Git for version control to manage changes in the codebase and facilitate collaboration with fellow developers.
- Developed APIs for ERP website.
- I have experience utilizing Microsoft Azure.

Backend Developer – 8Box Solutions (Sampaloc, Manila)

Feb 2023 – December 2023

- Managed server-side logic for websites using C# and JavaScript.
- Maintained CRM website's API for Doctors.
- Developed APIs for ERP website.
- Oversaw database management and optimization tasks.
- Employed Git for version control to manage changes in the codebase and facilitate collaboration with fellow developers.
- Handled project deployment and ensured operations ran smoothly and without errors.
- Crafted API endpoints for various projects using Node.js and C#.
- Rectified bugs and implemented updates for optimal website functionality.
- Honed skills in Node.js, leveraging its asynchronous, event-driven architecture to create scalable and high-performance applications.
- Gained expertise in .Net, using its asynchronous, event-driven architecture to build scalable and high-performance applications.
- Developed strong JavaScript abilities, enabling the execution of efficient and elegant code in Node.js projects.
- Developed a solid understanding of software development principles, including version control (e.g., Git), code documentation, and collaboration tools (e.g., GitHub).
- Effectively used the Express.js framework to create robust and RESTful APIs, facilitating efficient client-server communication.
- Showcased proficiency in using npm (Node Package Manager) to manage project dependencies and maintain efficient development workflows.
- Worked effectively with cross-functional teams of developers, designers, and stakeholders to meet project objectives, ensuring seamless coordination and effective communication throughout the development process.
- I have experience utilizing Microsoft Azure.

Javascript Developer (Mid-Level) – Arcadier PTE LTD (Taguig)

January 2024 – September 2024

- Managed server-side logic for websites using C# and JavaScript.
- Developed Auto Marketplace for International Clients.
- Oversaw database management and optimization tasks.
- Employed Git for version control to manage changes in the codebase and facilitate collaboration with fellow developers.
- Handled project deployment and ensured operations ran smoothly and without errors.
- Managed Web Application Firewall for the Security of the Website
- Rectified bugs and implemented updates for optimal website functionality.
- Honed skills in Node.js, leveraging its asynchronous, event-driven architecture to create scalable and high-performance applications.
- Honed skills in React.js, leveraging its component-based architecture and virtual DOM to create dynamic, responsive, and high-performance user interfaces. Developed strong JavaScript abilities, enabling the execution of efficient and elegant code in Node.js projects.
- Practiced and developed a solid understanding of software development principles, including version control (e.g., Git), code documentation, and collaboration tools (e.g., GitHub).
- Showcased proficiency in using npm (Node Package Manager) to manage project dependencies and maintain efficient development workflows.
- Worked effectively with cross-functional teams of developers, designers, and stakeholders to meet project objectives, ensuring seamless coordination and effective communication throughout the development process.
- I have experience utilizing Microsoft Azure.
- Gained experience with Jira, utilizing it for project management, issue tracking, and team collaboration within software development projects.
- Acquired experience working directly with clients, ensuring their requirements are met and delivering tailored solutions.
- Work directly with foreign clients to clarify requirements and deliver solutions.

Software Developer - (Remote) November 2024- Present

- Developed and implemented accounting systems using TypeScript, React.js and Next.js, ensuring efficient data management and user-friendly interfaces.
- Developed key accounting modules, including Accounts Receivable (AR), Accounts Payable (AP), Invoicing, Billing, Journal Entries, and Financial Reporting.
- Implemented invoice and billing workflows, including transaction recording, financial calculations, and reporting to support accurate financial management.
- Developed Accounts Receivable and Accounts Payable functionality for managing customer receivables, vendor payables, and financial transactions.
- Integrated financial calculations and accounting business logic to ensure accurate processing and reporting of financial data.
- Developed and integrated RESTful APIs to support frontend functionality, data processing, and communication between application components.
- Utilized Knex.js for database query building and optimized interactions with MySQL databases to manage financial records and transactions.
- Utilized **Prisma ORM** for database management, including updating database schemas, modifying columns, and maintaining data models to support evolving system requirements.
- Designed and maintained MySQL databases using MySQL Workbench, ensuring accurate and scalable data structures for accounting-related operations.
- Deployed and maintained applications on AWS EC2, managing server environments and application deployments.
- Implemented data validation, error handling, and business logic to improve application reliability and data integrity.
- Integrated financial calculations and reporting features to improve the functionality and accuracy of the accounting system.
- Debugged and resolved application issues across the frontend, backend, and database layers.
- Leveraged Jira for project management, issue tracking, and collaboration with cross-functional teams.
- Employed GitLab for version control, repository management, and collaborative software development.
- Collaborated closely with the Project Manager (PM) and participated in regular stand-up meetings to align on project goals, progress, and deadlines.
- Worked directly with clients to clarify requirements, provide technical solutions, and deliver requested features.

TOOLS , FRAMEWORK & SOFTWARE USED

JIRA	Slack	Confluence	SQL Server Management Studio	Microsoft Azure
VS Code	Visual Studio	IIS	Git	Browserstack
				AWS
MySQL Workbench	GitLab
